DESCRIPTION

CRAYVALLAC® A-620-A2 is a high performance polyacrylate surface tension modifier for the control of coating surface properties. CRAYVALLAC® A-620-A2 is suitable for use in a wide range of solvent based systems and applications. CRAYVALLAC® A-620-A2 has been developed specifically to enhance substrate wetting and to improved leveling. As a result when compared with unadditivated coating, film defects such as craters, fisheyes, orange peel and pinholes are reduced and a superior overall appearance of the film is visible.
