FORMULATION GUIDELINES

RECOMMENDATIONS FOR USE

Water white films are deposited from the resin, and clear or pigmented films possess fast air dry times and are resistant to soaps and detergents. The films are also resistant to degradation when exposed to heat or edging. The versatility of SYNOCRYL® 874X-45 enables it to be used in variety of finishes either as the sole vehicle in clear or pigmented coatings for various plastics, metal, wood and fabrics or as a modifying resin to improve the drying time, durability and resistance properties of other coating systems.

Proposals to use the resin in other ways should be discussed with Arkema before any action is taken.

SYNOCRYL® 874X-45 is soluble in a range of aromatic hydrocarbons, esters and ketones.

The resin has limited solubility in aliphatic hydrocarbons and alcohols.

SYNOCRYL® 874X-45 is compatible with a range of cellulose esters, vinyl resins and chlorinated rubber.
