FORMULATION GUIDELINES

DRIERS

A suitable drier for use in air drying systems with SYNOLAC® 2833 X 60 is 0.05% cobalt, 0.15% zirconium and 0.15% manganese calculated as metal on solid resin. Depending on the formulation (clear, pigmented, thixotropic, etc...) and on the application, the loading of each drier may be increased or reduced in order to achieve the appropriate drying/hardness profile.

The use of antiskinning agent is essential to prevent in-can skinning of the finished product.

SOLUBILITY

SYNOLAC® 2833 X 60 is soluble in aromatic hydrocarbons, esters, ketones and glycol ethers, partially soluble in terpenic solvents and insoluble in alcohols.

COMPATIBILITY

SYNOLAC® 2833 X 60 is compatible with urea/formaldehyde, benzoguanamine/formaldehyde and nitrocellulose resins, partially compatible with medium oil alkyd resins and melamine/formaldehyde resins and incompatible with drying oils.

PRODUCT SAFETY

Please refer to the corresponding Safety Data Sheet.

STORAGE AND HANDLING

SYNOLAC® 2833 X 60 should be stored indoors in the original, unopened and undamaged container, in a dry place at a temperature not exceeding 30°C. Exposure to direct sunlight should be avoided.

In the above mentioned storage conditions the shelf life of the resin will be from the shipping date.
